All figures represent actual verified work output. References are available on request.

WORK PORTFOLIO — MAY 2026

About This Portfolio

This is four years of real work, documented honestly. Every figure here came from an actual reconciliation or financial report. The SOPs are the procedures I follow or helped build. The process improvements are things I introduced, measured, and can walk through in detail. Nothing is invented to look impressive.

"I started in customer service — learning to communicate with people before I learned to manage their money. That order matters. Every reconciliation I close, every report I write, every wire I confirm is ultimately in service of real people and real businesses. That perspective is what makes me careful."

My career moved through customer service, partner agreements and pricing under a CPA's mentorship, API integration support and company onboarding, and eventually into a full treasury role where I now own the daily cash cycle, multi-account reconciliation, intercompany fund management, and CFO-level reporting across multiple operating regions.

I have anonymised all entity and operator references throughout. If you are considering me for a role and want to verify any of this work, I am glad to discuss it in detail during an interview or provide a reference from my supervising CPA.

Career Overview

Oct 2024
– Present

Treasury Officer & Vice President

Cross-Border Payment Company | Dakar, Senegal

Full treasury cycle ownership — daily cash positioning, intraday liquidity monitoring, multi-account reconciliation, SWIFT / RTGS / NEFT settlements, AML / KYC compliance, CFO-level reporting, SOP development, team training. Managing 14 accounts across 4 operating regions.

Dec 2022
– Sep 2024

VP Business Development

Global Remittance Platform | New York, USA (Remote)

Partner agreement negotiation and pricing, correspondent company onboarding under CPA mentorship, API integration coordination and UAT support, annual KYC reviews, banking communication, customer escalation management.

Aug 2021
– Nov 2022

Operations Supervisor

Fintech Group | CFA Zone, West Africa

Agent and correspondent setup, fee and commission configuration, daily transaction monitoring for structuring patterns, UAT coordination between IT and operational teams, customer service and platform support.

Key Performance Metrics

2 . 6B+ Total liquidity under management (local currency)	1 . 7B+ Monthly inflows processed — all regions combined	14 Accounts reconciled monthly across 4 operating regions	5 , 500+ Individual transactions processed and verified
99 . 99% Month-end reconciliation accuracy — consistently maintained	Zero Material discrepancies at any month-end close	7 Intercompany fund transfers coordinated in one month	622 Settlement partner transactions verified — confirmed zero
–40% Reduction in month-end processing time via automation	4 Regions with full financial reports and reconciliation		

Monthly Financial Reports — May 2026

Each month I prepare a complete financial performance review for every operating region. The figures below are extracted from the verified May 2026 reports. All entity and location identifiers have been replaced with region codes.

REGION A — MAY 2026

Opening Balance	172,600,802
Commission Income	42,922
Total Inflows	301,701,297
Funds Available	474,345,021
Total Disbursed	291,177,844
Closing Balance	183,167,177
Primary Bank	71,128,299 ✓
Secondary Bank	60,534,475 ✓
Discrepancy	0 Confirmed

REGION B — MAY 2026

Opening Balance	70,210,341
Wire Inflows (×3)	118,500,000
Platform Earnings	259
Total Inflows	188,710,600
Remittance Payouts	92,895,838
Operating Fees	91,209
Closing Balance	95,814,763
Primary Bank	49,292,411 ✓
Branch Float	16,074,777 ✓
Wallet A	16,655,567 ✓
Wallet B — Moov	4,518,830 ✓
Wallet C — Wave	9,273,176 ✓

REGION C — MAY 2026

Opening Balance	18,550,800
Wire Inflows	20,000,000
Total Inflows	38,551,059
Remittance Payouts	11,749,914
Operating Fees	24,424
Closing Balance	10,634,885
Primary Bank	4,578,641 ✓
Wallet A	780,809 ✓
Wallet B	5,275,417 ✓

REGION D — MAY 2026

Opening Balance	782,700,578
Commission Income	69,030
Total Inflows	1,405,178,335
Funds Available	2,187,947,943
Total Disbursed	1,415,697,380
Closing Balance	772,250,563
Primary Bank	35,871,815 ✓
Partner Bank	31,245,474 ✓

Branch Float	32,106,977	✓
Digital Wallet	2,265,932	✓

Reconciliation Work Samples

Every account listed below was reconciled to zero — or within an accepted rounding tolerance of less than 0.05 local currency units — at month-end. Status confirmed by management sign-off.

ACCOUNT (ANONYMISED)	INFLOWS	OUTFLOWS	STATUS
Primary Bank — Region A	102,548,797	112,097,011	Confirmed — 0
Secondary Bank — Region A	167,450,000	138,593,800	Confirmed — 0
Branch Float — Region A	103,277,500	113,241,737	Confirmed — 0
Digital Wallet A1	35,039,282	27,230,160	Confirmed — 0
Digital Wallet A2	10,000,000	14,606,504	Confirmed — 0
Digital Wallet A3	3,640	1,746,803	Confirmed — 0
Primary Bank — Region B	118,500,000	92,091,209	Confirmed — 0
Branch Float — Region B	10,000,000	169,500	Confirmed — 0
Digital Wallet B1	82,000,000	84,277,067	Confirmed — 0
Digital Wallet B2	259	158,066	Confirmed — 0
Digital Wallet B3	5,000,000	8,118,808	Confirmed — 0
Primary Bank — Region C	20,000,000	9,040,000	Confirmed — 0
Digital Wallet C1	—	462,780	Confirmed — 0
Settlement Platform (USD)	187,407	188,432	Confirmed — 0

Total Accounts Reconciled 14 | **Material discrepancies: Zero**

SETTLEMENT PARTNER — USD ACCOUNT VERIFICATION

Opening Balance (prior month-end)	23,486.98 USD
Total Send Transactions (622)	188,432.18 USD
Total Wires + Cancellations	187,407.45 USD
Net Settlement Activity	1,024.94 USD
Calculated Closing Balance	24,511.92 USD
System-Reported Closing Balance	24,511.92 USD

Reconciliation Difference	0.00 USD	✓ Confirmed
---------------------------	----------	-------------

Earnings (% of payout volume)	1,774.34 USD
-------------------------------	--------------

What I Changed and Why

The three improvements below are real. Each one is still in use and each has a measurable outcome. I believe good operations should not depend on one person remembering everything — they should be systematically better.

01 — Automated Multi-Region Monthly Dashboard

PROBLEM	Every month I manually copied figures from four separate regional reports into a consolidated summary. This took hours and introduced real risk of transcription errors at the moment when accuracy matters most — month-end reporting to management.
SOLUTION	A linked Excel dashboard that pulls directly from each regional file using cell references. The consolidated summary, variance analysis, and reconciliation status all update automatically when regional data is entered.
RESULT	40% reduction in month-end processing time. Zero transcription errors since implementation. Management receives the consolidated report faster and with greater confidence in the numbers.

02 — Live Reconciliation Status Tracker

PROBLEM	During the close period, managers had no way to see at a glance which accounts had been reconciled and which were still outstanding. This created repeated status interruptions and ambiguity about whether the close was complete.
SOLUTION	A shared tracker showing every account, its status (Pending / In Progress / Confirmed), any discrepancy, the sign-off date, and the responsible person. Updated in real time during the close period by whoever is working on each account.
RESULT	Managers can monitor close progress without interrupting the team. Open items are visible immediately. The close now has a shared, unambiguous definition of done.

03 — Intercompany Transfer Log

PROBLEM	Intercompany transfers were confirmed by email but there was no single place to view all movements for the month. Month-end reconciliation of intercompany accounts was slow and the audit trail was fragmented across inboxes.
SOLUTION	A structured monthly log capturing every transfer with: date initiated, date received, amount and currency, sending account, receiving entity, reference numbers on both sides, authorised by, and confirmed by.

RESULT

Intercompany reconciliation now takes under 30 minutes instead of half a day. The audit trail is complete and immediately accessible. No transfer is lost between month-end and audit review.

SOPs — Treasury & Payments Operations

These procedures are what I follow and have helped develop. They are written to be clear enough that a trained colleague could execute them independently.

SOP 001	Daily Cash Position Management	Frequency: Daily
Purpose: Maintain an accurate, real-time view of liquidity across all accounts at all times. No fund movement to be initiated without this position being confirmed.		
STEP 1 — MORNING OPEN		
01.	Log in to all banking and wallet portals and download overnight statements	
02.	Record the opening balance for each account in the daily cash tracker	
03.	Identify any overnight transactions not yet matched to an internal record	
04.	Flag any balance below the minimum threshold to line manager before 10:00 AM	
05.	Cross-check total opening position against the prior-day confirmed closing figure	
STEP 2 — INTRADAY MONITORING		
01.	Update account balances after each wire received or sent	
02.	Record all digital wallet top-ups and payout settlements in real time	
03.	Flag any unrecognised credit or debit immediately — do not wait for end of day	
04.	Confirm pre-funding is in place before any large scheduled settlement	
05.	Respond to management cash position queries within 15 minutes during business hours	
STEP 3 — END OF DAY CLOSE		
01.	Download final statements from all portals	
02.	Confirm all expected inflows have arrived and all scheduled payments have been sent	
03.	Record the confirmed closing balance for each account	
04.	Note any outstanding items with expected resolution dates	
05.	Send the daily cash summary to management by the agreed close time	

Controls: No fund movement without written authorisation. Dual review required for movements above threshold. All entries logged with timestamp and reference number.

SOP 002 **Monthly Bank Reconciliation**

Frequency: Monthly — within 3 business days

Purpose: Ensure every internal ledger entry matches the official bank statement for every account. Target: zero discrepancy. Accepted rounding tolerance: less than 0.05 local currency units.

STEP 1 — GATHER DOCUMENTS

01. Download official statements for all accounts
02. Export the internal transaction record for the period
03. Confirm all transactions have been entered into the ledger before starting

STEP 2 — STATEMENT MATCHING

01. Open the reconciliation template and enter the statement opening balance
02. Work through each bank entry and match to the corresponding internal ledger line
03. Mark matched items as cleared — use a status column, not mental tracking
04. List every unmatched item in the reconciling items section with a reference number

STEP 3 — INVESTIGATE DIFFERENCES

01. For each unmatched item, determine the cause: timing difference, missing entry, or error
02. Timing differences: note the expected clearing date and carry forward
03. Missing entries: create the journal entry with a supporting document attached
04. Errors: prepare a correction memo and obtain manager approval before posting

STEP 4 — SIGN-OFF AND FILING

01. Confirm the adjusted balance equals the bank statement balance
02. Record the final discrepancy in the reconciliation summary (target: zero)
03. Attach all supporting documents to the completed reconciliation
04. Submit to manager for review. File the signed reconciliation in the monthly folder

Controls: Reconciliation must be reviewed by a second person before sign-off. Any discrepancy above threshold must be escalated on the day of discovery. All reconciliations retained for minimum 7 years.

Purpose: Reconcile the balance and transaction history of each digital payment platform against internal payout records. Any unexplained credit must be flagged to compliance before sign-off.

STEP 1 — COLLECT PLATFORM REPORTS

01. Export the monthly statement from each platform: opening balance, payouts, top-ups, closing balance
02. Note any platform-generated fees, adjustments, or error credits separately

STEP 2 — CALCULATE EXPECTED CLOSING

01. Total all payout entries in the internal system for this platform for the month
02. Total all top-up and credit entries in the internal system
03. Calculate: Opening + Top-ups – Payouts – Fees = Expected Closing
04. Compare expected closing to the platform-reported closing balance

STEP 3 — INVESTIGATE DIFFERENCES

01. Pull transaction-level detail for any unmatched amount
02. Check for: payout logged but not on platform; top-up in transit; cancelled transaction not reversed; platform fee not recorded internally
03. Do not assume the platform is correct — verify both sides before making any adjustment

STEP 4 — RESOLVE AND SIGN OFF

01. Correct any missing or incorrect entries with supporting evidence
02. Note any platform-side issues and follow up in writing
03. Record final reconciliation status and obtain manager sign-off
04. Any unexplained credit: flag to compliance before close, do not sign off until resolved

Purpose: Ensure every intercompany fund movement is authorised, documented, and reconciled on both sides. No transfer may be initiated without written authorisation on file.

STEP 1 — AUTHORISATION

01. Receive the funding request in writing — amount, receiving entity, value date, bank details

02. Verify sufficient available balance in the sending account

03. Obtain written authorisation from an approved signatory before initiating

STEP 2 — EXECUTION

01. Log in to the banking portal and initiate the transfer

02. Enter all fields carefully — errors in beneficiary details can cause failed or misdirected payments

03. Record the payment reference number and download the confirmation

04. Notify the receiving entity that the transfer has been sent

STEP 3 — CONFIRMATION AND LOGGING

01. Follow up to confirm funds arrived at the receiving entity

02. Record in the transfer log: date, amount, sending account, receiving entity, reference numbers both sides, authorised by, confirmed by

03. Match the transfer in the ledger on both the sending and receiving sides

STEP 4 — MONTH-END RECONCILIATION

01. At month-end, reconcile all intercompany balances — every transfer sent must match a receipt

02. Investigate any timing differences and document expected clearing dates

03. Include confirmed intercompany reconciliation in the month-end close sign-off

Controls: No transfer without written authorisation. Transfers above threshold require dual approval. All transfers documented with supporting evidence before month-end close.

SOP 005 Month-End Close Procedure

Frequency: Monthly — target 5 business days

Purpose: Complete all financial recording, reconciliation, and reporting by the agreed close deadline — cleanly, completely, and in the right order.

PRE-CLOSE — FINAL DAY OF MONTH

01. All transactions for the month entered and posted in the system

02. All pending wires and payments followed up and resolved

03. Daily cash position updated and confirmed at close of business

04. All platform top-ups and payout settlements recorded

CLOSE DAY 1

01. Download all bank statements
02. Complete bank reconciliation for each account
03. Complete platform reconciliation for each digital wallet
04. Reconcile branch float movements

CLOSE DAY 2

01. Reconcile all intercompany accounts
02. Review open items from the prior month — confirm cleared or escalate
03. Prepare variance analysis and draft management report

CLOSE DAY 3 — DELIVERY

01. Manager review of all reconciliations
02. Obtain sign-off on each completed reconciliation
03. Finalise and deliver monthly financial performance report to senior management
04. File all supporting documents in the monthly archive folder
05. Update the reconciliation status tracker to Closed

Quality targets: All bank reconciliations: zero discrepancy. All wallet reconciliations: less than 0.05 local currency units. Report delivery: within 5 business days of month-end.

SOP 006 Settlement Partner SOA Verification

Frequency: Monthly

Purpose: Verify the Statement of Account received from settlement partners against internal records to ensure accurate billing, correct net settlement, and no unresolved disputes at month-end.

STEP 1 — RECEIVE AND RECORD

01. Download or extract the SOA from the partner system at month-end
02. Note headline figures: opening balance, total sends, cancellations, fees, closing balance
03. Record in the SOA verification template before beginning the match

STEP 2 — TRANSACTION-LEVEL MATCHING

01. Export all send transactions from internal records for the same period
02. Match each send to the SOA entry by: transaction reference, amount, currency, date
03. Mark each matched item as verified

04. List every unmatched item for investigation

STEP 3 — FEE AND CANCELLATION VERIFICATION

01. Calculate expected fees: total send volume multiplied by the agreed fee rate
-
02. Compare calculated fees to the fees shown on the SOA
-
03. Match each cancellation to the original send — verify the credit amount equals the original
-
04. Flag any fee discrepancy for partner follow-up before sign-off

STEP 4 — CLOSE AND REPORT

01. Calculate: Opening + Net Sends – Net Cancellations – Fees = Expected Closing
-
02. Compare calculated closing to the SOA closing balance
-
03. If zero difference: sign off and file with the monthly reconciliation package
-
04. If difference exists: document, contact partner in writing, do not sign off until resolved

TECHNICAL COMPETENCIES

Skills & Tools

TREASURY & FINANCE

Daily cash position management

Bank & nostro reconciliation

Multi-currency operations

SWIFT MT103 / MT202 / MT300

RTGS & NEFT settlements

FX monitoring & settlement

Intraday liquidity management

CFO-level financial reporting

Variance analysis

Intercompany accounting

Month-end & year-end close

COMPLIANCE & RISK

AML policy enforcement

KYC / KYA due diligence

OFAC sanctions screening

Suspicious Activity Reporting

Bank Secrecy Act compliance

USA PATRIOT Act compliance

Transaction structuring detection

Annual KYC review management

Partner agreement review

SYSTEMS & OPERATIONS

Advanced Excel — Pivot, VLOOKUP, Power Query

Dashboard automation

QuickBooks Online

Banking portal operations

FX rate tools

Settlement platform reporting

API integration support

UAT coordination

SOP development & documentation
